

Three New Series of Coolant-Thru Parting and Grooving Holders

T-Burst [GO >](#)

- Three unique systems:
 - Traditional T-Clamp Ultra Plus holders
 - New T-Clamp Ultra Plus TTER/L-SH-TB holders – with side-clamping system for Swiss-type CNC lathes
 - GoldFlex holders, featuring 4 cutting edges
- Excellent chip breaking and tool life in difficult-to-cut materials such as titanium, inconel and other heat-resistant alloys
- Reduced cycle time and higher productivity due to increased cutting speed capability
- Longer tool life even under normal coolant pressure
- Capable of up to 4,900 PSI coolant pressure
